Yellow. Crop contained one large contained remains of lizards, hair Skull of mammal preserved.	

Note. - "Granaecalus (Caterpillar
shrike): a dark slaty bird, with black
wings and tail. Bird larger than a Robin.
This Granaecalus is a member of
the family Campephagidae, all the
species of which have the feathers
of the rump stiffened - that is the
shafts are stiff. Another member
of the family is - Lalage, terat.
a gray, white, and black bird - size of
a small Shrike, of which you got
Nos. 13044, 13048-9, + 13067."
